SUMMARY:

Highly motivated and diligent Computer Engineering student and Junior Flutter Mobile Application Developer with a strong track record of developing and deploying 20+ responsive mobile applications. Proven expertise in clean code architecture, state management, and API integrations, achieving consistent top-tier academic and training rankings (95% – 97% evaluation scores). Adept at leading peer teams, optimizing user engagement by 30%, and boosting user retention by 40%. Eager to contribute technical proficiency in mobile development and cybersecurity to innovative software initiatives.

EDUCATION:

Latakia University – B.Sc. in Computer Engineering & Automatic Control (Graduated: 2026).

Academic Standing: **Ranked 3rd** in the academic cohort.

EXPERIENCE:

Flutter Developer Trainee – *Focal X Academy* (Feb 2023 – Feb 2025)

- Developed and deployed **20+ responsive mobile applications**, focusing on UI/UX optimization and performance enhancements, resulting in a **30% increase in user engagement** across published apps.
- Consistently ranked in the **Top 3** of academy evaluations with scores between **95% – 97%**.
- Mentored and guided junior peers, improving team project delivery efficiency by **70%** through code reviews and pair programming
- Balanced daytime responsibilities with intensive self-study at night to master advanced Flutter concepts and state management solutions.
- Integrated Firebase services (Authentication, Push Notifications, Firestore) and in-app payment systems into 10 applications, boosting active user retention by 40%.
- Implemented Google Maps and external APIs in 5 projects, enhancing location accuracy and feature richness.

Technical Skills:

Programming Language(C++ , Dart , Kotlin),Design pattern(MVC , Clean architecture),State management (GetX , Provider), API Calls (dio , http),Firebase(Auth , Firestore, Notifications),DataBase(MySQL ,Shared Sqflite),Add Payment Method, Local Storage, Connected With Native Code, Google Maps and Localization, Problem solving, OOP, Algorithms, Data Structure.

Front-end:

HTML5,CSS3,JavaScript,React,Bootstrap,Reset API.

Cyber Security:

Red Team Penetration Tester with hands-on experience using Kali Linux and security tools such as Wireshark, Wi-Fi Scanner, and Malwarebytes to analyze networks and perform penetration testing on systems and web applications.

AI & Emerging Tools:

Proficient in utilizing multiple AI platforms (Chat-GPT, Claude, Google AI Studio, Copilot, Gemini, Black Box and AI-based code assistants) to enhance productivity, automate repetitive tasks, generate clean code, and improve problem-solving efficiency.

Tools:

Git & Github, Android Studio, VS code, Postman, Figma.

Soft Skills :

Time management, Collaboration, Patience, Handle Work Pressure, Teamwork, Communication, Self-learning, Leadership, Multitasking, Adaptability.

Certificates:

- [Cyber Security](#) - Focal X Academy.
- Application Developer - Focal X Academy: Flutter [Lv.1](#), [Lv.2](#).
- Web Developer - Focal X Academy: [Lv.1](#).

Flutter Projects:

- **Food CR** (E-commerce) – App for a single restaurant chain operating 6 branches in different areas. Users sign up/log in via Firebase Auth, pick a branch, and browse meals shown as available or currently unavailable, with ordering limited to available items. Includes a cart with live pricing, QR code support, and a built-in Tic-Tac-Toe (XO) game. [GitHub](#)
- **Labetak** (E-commerce, API-based) – Multi-restaurant app where each restaurant manages its own meals and services, built on a REST API covering authentication, restaurant/meal data, and cart operations (add/remove items). Delivered as part of a full development team at FocalX. [GitHub](#)
- **Hstore** (E-commerce, Admin Dashboard) – Modern perfume-store app using Firebase Auth & Firestore. The cart recalculates the total instantly on add/remove, and checkout accepts a 3-digit discount code that adjusts the final price when valid. Users can track order status (processing / issue / completed), leave reviews, browse FAQs, and submit new FAQs for admin approval. Integrates AI tools (ChatGPT, Gemini, DeepSeek) and QR codes. Includes an Admin Dashboard to add/update/delete perfumes, moderate reviews and FAQs, and update order status.

Web Projects:

- **Hstore Website** – Modern site featuring a rotating 3D perfume model, project details for the Hstore app, an APK download button, and a contact form that emails the Admin. [Website](#)
- **Your Bank** – Comprehensive and interactive online banking platform built with **React 19**, **Vite**, and **React Router**, featuring custom styling and smooth animations powered by **Framer Motion**. Includes detailed interfaces for banking products, real-time currency exchange rates, informative pages (About, Security, Careers), and a complete authentication system (Login/Signup). Features a dedicated Dashboard for managing FAQs with data persistence via localStorage, deployed seamlessly using **GitHub Pages**. Delivered as part of a full development team at FocalX.
